ABSTRACT:

PURPOSE: To utilize sufficiently functions that message waiting service and to improve its serviceability by checking whether there is a message at an incoming destination specified with password information or not and outputting the message to an inquiring terminal when there is the message.

CONSTITUTION: A message waiting control part 12 is provided with a means 13 which decides the password information corresponding to an incoming destination terminal from the inquiring terminal, a means 14 which

checks whether or
not there is the message at the incoming destination
specified with the pass
word information, and a means which outputs the message to
the inquiring
terminal when so. Consequently, the password information
specifying an incom
ing terminal is inputted from an optional terminal other
than the incoming
destination terminal to inquire whether or not there is an
incoming message to
the incoming destination terminal, and the originating
terminal of the message
is called back automatically from the inquiring terminal
when necessary,
thereby utilizing sufficiently the functions that the
message waiting service
has.
